SUMMARY

Senior Product Manager with 11+ years leading AI/ML innovation across healthcare, supply chain, mining, and retail. Proven track record of zero-to-one and one-to-hundred platform delivery, cross-functional team building, and GTM execution. Passionate about transforming operational complexity into scalable, AI-powered solutions.

EXPERIENCE

Sr. Technical PM, AI R&D

o9 Solutions, Bengaluru (*2025 - Present*):
- Built and scaled the data pipeline layer for o9's enterprise gen-AI offering.
- Redesigned o9's agent harness to enable consistent long-running and complex agent execution flows serving **1200+ users** across 12+ B2B clients daily.
- Expanded the connectors and triggers ecosystem to ingest live data and allow agents to connect to third party platform and databases like databricks.
- Built offline and online agent eval frameworks for execution transparency.
- Handled GTM strategy: product pricing, positioning, and patents.

Lead, AI
Assoc. Principal
Platform Consultant
Senior Assoc

Mathco, Bengaluru (*2020 - 2025*):
- Developed AskNucliOS, a no-code platform to accelerate and streamline Gen AI project lifecycle **cutting development time by 95%**.
- Lead an agile **16-member** team of data scientists, engineers, and designers on **8 Gen-AI projects**.
- Established **stakeholder alignment** for AI strategy across C-suite, sales, marketing, platform, and customer service.
- Created product sales pitch and drove adoption for internal and external stakeholders.
- Established the Gen-AI service line, currently generating **$8M annual revenue**.
- Built solution architecture for scalable demand forecasting and A/B testing platforms adopted across **6 CPG and retail engagements.**
- Conducted usability tests, product benchmark studies, and user research.
- Established the organization's LLM-Ops best practices.

Research Associate

Indian School of Business, Hyderabad (*2019 - 2020*):
- Conducted ML research and held classes in computer vision, deep learning, and data mining for **over 200 students**.

Assoc. Data Scientist

Geovale, Kolkata (*2015-19*):
- Developed **ML products** to assess market risks and applied game theory to optimize mineral auction strategies

SELECTED PROJECTS

GitHub (Portfolio)

1) Enterprise AI Layer Redesign for a Legacy Platform: • Redesigned the AI layer for a platform used by **200+ Fortune 500 clients**, preserving backward compatibility across data, APIs, identity, and integrations.

2) AskNucliOS — No-Code GenAI Development Platform: • Built a no-code GenAI platform for data prep, model deployment, orchestration, and monitoring; cut development time by **95%** and powered **50+ GenAI apps**.

3) Enterprise Agent Harness at Scale: • Scaled long-running agents with memory, reusable skills, file-system access, protocols, middleware, and tool orchestration; served **1,200+ daily users** across **12+ B2B clients**.

4) Online Evals for Production-Ready AI Platforms: • Evaluated **75,000+ monthly traces**, producing **750,000+ LLM judgments** and using **1,000+ user annotations** for release decisions.

EDUCATION

University College London,
M.Sc. Machine Learning and DS, *Merit*
Topics: Supervised and Unsupervised Learning (Clustering) • Deep Learning • Bayesian Networks • AI Architecture • NLP • Optimization • Computer Vision • Generative Models • Transformers • Reinforcement Learning • Human-Robot Interaction

University of Warwick,
M.Sc. Economics, *Merit*
Topics: Econometrics • Regression Analysis • Causal Inference • Time-Series • Hypothesis Testing • Monetary Economics • Macroeconomics • Game Theory • Design of Experiments • Panel Data

SKILLS

- **Product leadership**: digital transformation, AI roadmap, platform strategy, KPI, north star metric, stakeholder alignment, go-to-market, product life-cycle management, product vision
- **Product management**: rapid prototyping, MVP, product research, A/B testing, UIX, design, user research, user feedback, wireframes, agile, scrum, marketing
- **Tools:** Jira, confluence, lovable, claude code, codex
- **Programming:** Python
- **Gen AI:** RAG, Text-2-SQL, langchain, langfuse, harness engineering, streamlit, evals, tensorflow, pytorch, sklearn, pyspark, openai, hugging face, custom models, RLHF, memory, connectors, triggers
- **Database:** SQL, Vector DB, Enterprise Knowledge Graph, Data Ontology
- **Engineering**: Azure AI foundry, GCP, FastAPI, docker, kubernetes, microservices, databricks, LLMOps, MCP, A2A, Git, model monitoring

AWARDS & PUBLICATION

Google Scholar

- Agentic AI: The building blocks of sophisticated AI business applications

- Commonwealth Scholarship: awarded by University of Warwick for academic and leadership potential

- M6 Competition top 10 finish: the competition sets the gold standard in forecasting innovation across industry and academia
